SuperStore Sales Dashboard

Business Performance Report based on the provided dashboard

1. Executive Summary

The dashboard presents a consolidated view of retail performance. It reports approximately **2.3M Total Sales**, **286.4K Total Profit**, and **5.0K Total Orders**.

2. Key Dashboard Metrics

Metric	Value	Interpretation
Total Sales	2.3M	Overall sales generated
Total Profit	286.4K	Overall profit generated
Total Orders	5.0K	Total orders recorded

3. Yearly Sales Performance

The waterfall chart shows yearly sales contributions of approximately **0.5M in 2015**, **0.5M in 2016**, **0.6M in 2017**, and **0.7M in 2018**, resulting in approximately 2.3M total sales. The displayed pattern indicates increasing yearly sales contribution.

4. Regional Analysis

The dashboard provides filters for **Central, East, South, and West**, allowing regional performance to be examined and compared.

5. Category and Sub-Category Analysis

The treemap shows sales across **Technology, Furniture, and Office Supplies**. Visible sub-categories include Phones, Machines, Accessories, Copiers, Chairs, Tables, Bookcases, Furnishings, Binders, Storage, Appliances, Supplies, Paper, and Art.

6. Business Observations

• Overall sales are approximately 2.3M with positive total profit of approximately 286.4K.

• Yearly sales contributions increase across the displayed 2015–2018 period.

• Regional filters make it possible to compare Central, East, South, and West.

• The category treemap provides a quick view of sales concentration across products.

• Combining sales, profit, orders, time, region, and product hierarchy gives a broader business view.

7. Dashboard Features

Feature	Purpose
Date Range	Filter performance for a selected period.
Region	Analyze Central, East, South, or West.
KPI Cards	Monitor Total Sales, Total Profit, and Total Orders.
Sales by Year	View yearly contribution to total sales.
Category Treemap	Explore category and sub-category sales.

8. Conclusion

The SuperStore Sales Dashboard provides an interactive business-performance overview through KPIs, yearly sales progression, regional filtering, and category/sub-category analysis. It can support sales monitoring, regional comparison, product analysis, and business decision-making.
